

Striking the balance for 2010: 20th customer and pioneering developments at MINT Software Systems

Frontrunner in innovative scheduling software

The past 12 months were characterized by new customer projects and working towards the groundbreaking MINT Release 6.0 to become available in March 2011.

New customers

With a major training equipment and services provider, an aircraft manufacturer and a maintenance organization, MINT has significantly extended its customer diversity. It shows once more that MINT standard software is beneficial to the very different areas of record keeping, aviation training and duty roster scheduling.

Expansion

Since summer, MINT is represented in India by IGEP Foundation in cooperation with the Schleswig-Holstein Business Centre. While being market leader in Europe and having a substantial market share in other parts of the world, MINT strives to increase its brand awareness in India and the Far East. Our Asia-Pacific RoadShow in September was a successful kick-off to reach this aim. www.igep.org

Innovation in Grading

Task level grading for simulator training sessions is one of the functionality highlights realized in 2010. What's more, instructors can fill out the grade sheets on-line on their mobile devices and directly during the session.

Partnership for AQP compliance and implementation

MINT has partnered with XCELAR, a US consulting company highly experienced in supporting airlines with AQP process implementation. The two experts bundle their strengths to support airlines in depicting and optimizing their AQP processes in MINT TMS. This partnership has met great interest among US carriers and exciting projects are expected for 2011. www.xcelar.com

Promising outlook for 2011

New product: MINT Training Portal

With the upcoming Release 6.0, MINT will once again reach a milestone in software innovation. The MINT Training Portal enables customers to publish their training product catalog in a WebShop on their homepage. This is expected by training centers to be a great revenue enhancer and business booster, as their customers can easily search the portfolio, book trainings and pay on-line.

MINT UCON 2011

In March, customers from all over the world will gather in Dubai for the 2nd MINT UCON, hosted by no one less than Emirates Airline. The 2 conference days and the following training forum are highly appreciated as platform to exchange ideas, benchmark, network and learn. Also, it is leveraged to jointly create the future direction MINT software is to take. Because our customers are our most important driver to success!

ABOUT

MINT Software Systems, headquartered in Kiel, Germany, with representations in Sharjah (UAE) and the Americas, provides the market leading Training Management System for aviation organizations and is leading manufacturer of HR software tools for the MRO sector.
