## Compliance Management with Automated Qualification Record Keeping

**Part 145**

**Part 147**

**Pilots and Cabin Crew**

**Air Navigation Service Staff**

Some say,  
standard hampers flexibility.

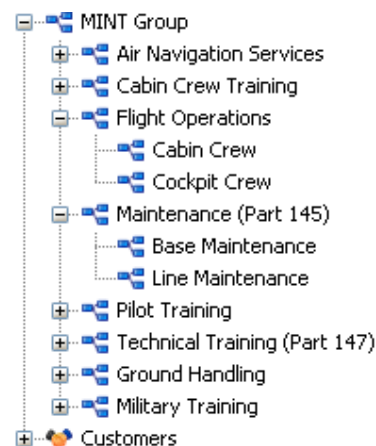

We say,  
our standard is flexibility!

MINT gives you innovative standard software that adapts to your individual processes!

## Functionality Highlights

### Your Organization at a Glance.

The system accurately depicts your corporate structure including all important employee details. All relevant licenses, authorizations, qualifications and training, such as CBT/WBT results as well as other skills are documented in the most proper way. MINT flexibility sets no limits!

### Qualification Profiles – All in one Place.

Qualifications, so-called Record Items, are transparently organized in trees, too. They can be linked to the original document scan – constituting a full-fledged on-line archive!

### Queries and Reports by Drag & Drop.

Through comprehensive ad-hoc query opportunities like multi-selection on Record Items, you will find employees with the required profile in the wink of an eye. The validity status is also displayed right away. More complex queries are built with drag & drop and produce custom table overviews. They are saved as templates for regular use.

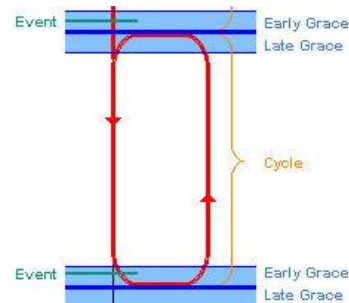

Status	Name	First name	Id	Photo	Phone	Email (Business)	Location
✘	Bris	Laurent	ID-4005		+33 123 456789	bl@technicaltraining.com	Bordeaux
✔	Burnstein	Francis	ID-1661		+41 123 457890	fb@technicaltraining.com	Geneva
⚠	Pierce	Julie	ID-2844		+33 234 987654	jp@technicaltraining.com	Bordeaux

### Prerequisites and Dependencies.

License A is not valid without Certificate B? Authorization X depends on a valid Medical Record? No problem, this link can be easily configured and then be monitored by the system!

### Authorization Renewal Workflow and Currency Monitor.

The Currency Queue (see right) produces an automated report on what Record Items are due for which people. Depending on what renewal cycles apply for the authorization, the expiry date is recalculated accordingly once the required training has been done. On top of that, the system sends out advance notifications when Record Items are about to expire and triggers the renewal process. In this workflow, the license holder can be given the possibility to forward and request the renewal himself and track the internal approval status.

### Scope of Authorization

This is to certify that the person is authorized by the Manager Quality Assurance in the categories listed below:

Name: SMITH, Joanna  
 ID: 12345  
 Authorization No.: MINT 329  
 License Number: MINTKEL 00012  
 License Expiry Date: 31/12/2010

ENDORSEMENTS	ORIGINAL ISSUE	THIS ISSUE	EXPIRES
<b>Certification of Release to Service B1.1</b>			
Airbus A330 (RR Trent)	21/04/2009	15/03/2011	15/03/2013
Airbus A340 (CFM56)	21/04/2009	15/03/2011	15/03/2013
Airbus A340-600 (RR Trent)	25/03/2008	25/03/2010	25/03/2012
<b>ETOPS</b>			
A330	21/05/2008	15/04/2010	15/04/2012

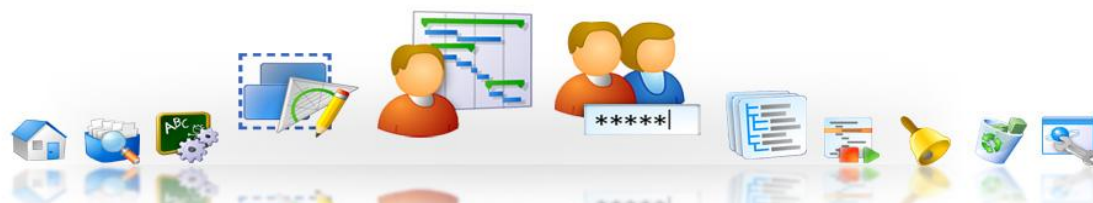

### Documentation Workflow.

This one works in a similar way. Notifications are sent out when e.g. important documentation needs to be communicated. By making the addressee confirm receipt of the information, managers have a means to control that information has been acknowledged.

### Immediate Record Download.

EASA requires records to be presented within 24 hours. Here it's a matter of seconds!

Up-to-date records are available for download in PDF format and your customized layout any time.

# On-Demand Subscription – Independence through Flexibility

Known also as Hosting, Application Service Providing (ASP) or Software as a Service (SaaS), an On-Demand Subscription has a number of advantages when compared to a Software License. The basic difference is that with a License, the software is installed at the customer's servers and he needs to take care of related software and hardware requirements as well as smooth operations. Those who opt for an On-Demand Subscription, just need Internet Access to use the system which is then installed on MINT's servers. All other responsibilities lie with MINT as Service Provider, too.

Instead of a one-off license fee, a monthly or annual subscription rate applies which also includes software support.

## The Benefits of On-Demand Service

### Cost & Speed of Deployment

- ▶ No local installation, new versions immediately available
- ▶ Lower initial costs as you save investments into servers, hardware and Oracle license
- ▶ No IT specialists needed to maintain the software
- ▶ Cut this entire portion out of budget and timeline and just
- ▶ **TURN IT ON!**

### Internet: Centralized Data

- ▶ No data redundancy
- ▶ Worldwide access
- ▶ Temporarily independent
- ▶ Enhanced communication
- ▶ High adoption as app is available from any computer or device. Better learning curve as most people are familiar with using the Internet

### Security

- ▶ Safeguarded system performance
- ▶ Highest encryption standards
- ▶ Constant and secure access
- ▶ Local data backup any time, e.g. MS Excel
- ▶ MINT responsible for operations and availability

### Cost Control

- ▶ No cost for license, small monthly subscription fee instead
- ▶ Operation and Support Included
- ▶ Customers can start out with smaller pilot projects and expand gradually

## Value Creation, Cost Savings, Resource Utilization

With its diverse advantages that offer a lot of flexibility and independence, On-Demand software is no doubt beneficial for small and medium sized companies as well as for large industry players.

Quality in a product or service is not what the supplier puts in.

It is what the customer gets out and what gives them value.

Peter Drucker

## Stepping Stone.

### Integration into your IT Infrastructure.

Through MINT's powerful Application Programming Interface (API) MINT WebAssistant can be connected to virtually any other of your programs you want to exchange data with.

### Upgrade to MINT MRO.

When complementing the application with the module MINT Shifts, you get the comprehensive MINT MRO solution. Shift rosters are managed based on employees' qualification profiles. Fixed and flexible shift rhythms with employee bidding are supported as well as short to long-term capacity planning.

Kindly refer to our MINT MRO brochure and the Case Study at

**Lufthansa Technik**

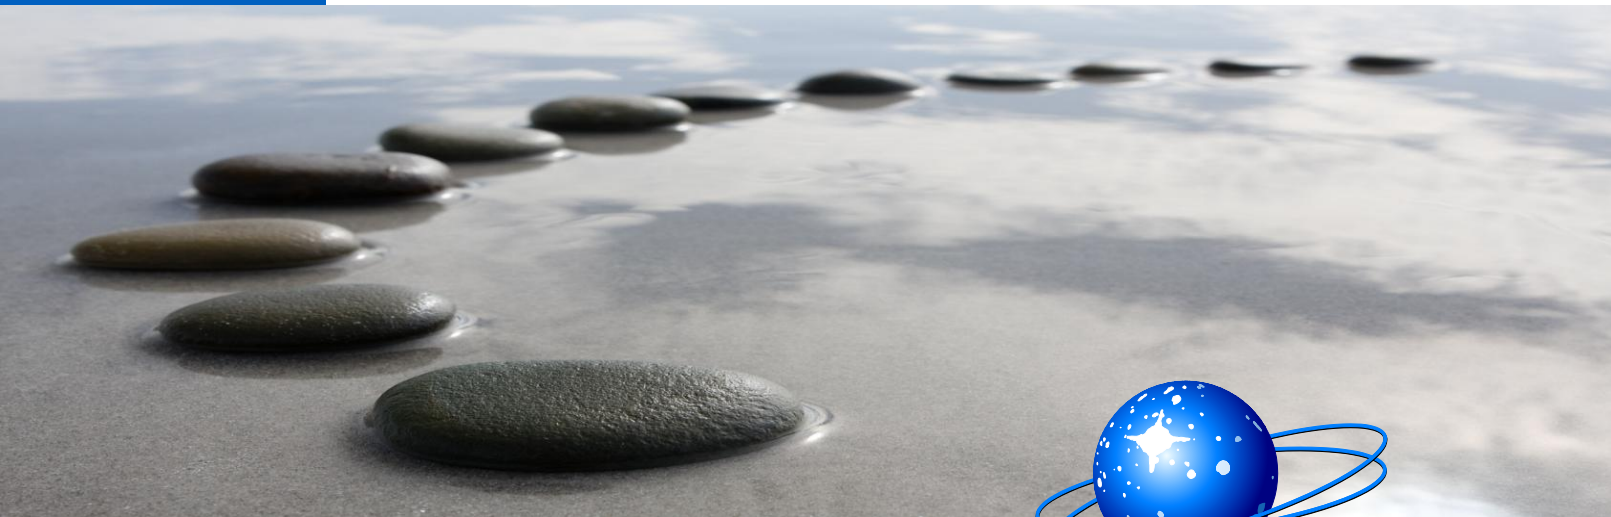

### Upgrade to MINT TMS.

MINT WebAssistant is likewise the basic module for managing compliance and training scheduling in the MINT TMS Suite. Key areas in training management are request and demand administration, curriculum design, automated scheduling and on-line grading.

Kindly refer to our MINT TMS brochure and the Case Studies at
